

Audiometry.Model.TabModel.
ImpedanceModel.AddRecordToDatabase

Audiometry.Model.TabModel.
ImpedanceModel.UpdateRecordInDatabase

Audiometry.Model.TabModel.
ImpedanceModel.GetViewModelProperty
Values

```
graph LR; A[Audiometry.Model.TabModel.  
ImpedanceModel.AddRecordToDatabase] --> C[Audiometry.Model.TabModel.  
ImpedanceModel.GetViewModelProperty  
Values]; B[Audiometry.Model.TabModel.  
ImpedanceModel.UpdateRecordInDatabase] --> C;
```

The diagram illustrates a dependency or data flow. On the left, two white rectangular boxes represent source methods: 'Audiometry.Model.TabModel.ImpedanceModel.AddRecordToDatabase' (top) and 'Audiometry.Model.TabModel.ImpedanceModel.UpdateRecordInDatabase' (bottom). On the right, a gray rectangular box represents the target method: 'Audiometry.Model.TabModel.ImpedanceModel.GetViewModelPropertyValues'. Two blue arrows point from the right side of each source box to the left side of the target box, indicating that both source methods depend on or provide data to the target method.
