

global::SystemConfiguration
::ApplicationSettingsBase

```
classDiagram
    class Base["global::SystemConfiguration::ApplicationSettingsBase"]
    class Derived["Audiometry::Properties::Settings"]
    Base <|-- Derived
    Derived --> Derived : -defaultInstance
```

The diagram consists of two class boxes. The top box is white and represents the base class 'global::SystemConfiguration::ApplicationSettingsBase'. It has two empty compartments below the name. The bottom box is gray and represents the derived class 'Audiometry::Properties::Settings'. It has two empty compartments below the name. A red arrow with an open triangle head points from the derived class to the base class, indicating inheritance. A curved line with an open diamond at the end connects the right side of the derived class to the text '-defaultInstance'.

Audiometry::Properties
::Settings
